## PROJECTS

**ONLINE EXAMINATION SYSTEM**  09/2023 – 11/2023
The Online Examination System is a comprehensive web-based platform designed to streamline the process of conducting examinations remotely. It offers a user-friendly interface for both administrators and examinees, facilitating efficient management and seamless execution of exams.

**DRIVER DROWSINESS DETECTION**  02/2024 – 06/2024
The Driver Drowsiness Detection project is an innovative solution aimed at enhancing road safety by alerting drivers when they exhibit signs of drowsiness or fatigue while operating a vehicle. Leveraging advanced technologies such as computer vision and machine learning, the system continuously monitors the driver's behavior and physiological signals to detect potential signs of drowsiness in real-time.
